Disabling the Security Information Message

Do you get the following Security Information prompt every time you click on a link or tab on the new Finance website when you are using Internet Explorer?

If you do, there’s an easy way to disable the message so that you go directly to the location you select. Just follow these steps:

1. With any web page displayed in Internet Explorer, click the **Tools** button.

2. On the drop-down menu, select **Internet Options**.
3. On the Internet Options menu, click the **Security** tab.
4. Click the **Custom level** button.
5. Scroll down to **Display mixed content**.
6. Click **Enable**.
7. Click OK at the bottom of the screen.
8. On the Security tab of the Internet Options screen, click Apply and OK.

The prompt is disabled in Internet Explorer.
