Emory University is a private, national research university with a history of working collaboratively for positive transformation in the world through courageous leadership in teaching, research, scholarship, health care, and social action. Emory is known for its outstanding liberal arts colleges and superb professional schools, and for having one of the leading health care systems in the South.

Maples, oaks, magnolias, pines, and dogwoods grace the gently rolling hills of Emory’s campus, half of which is set aside as green space. Emory’s distinctive pink and gray Georgia marble-clad buildings with red tile roofs blend in with the elegant neighboring Druid Hills community, located just fifteen minutes east of downtown Atlanta.

Emory’s location in the vibrant, international city of Atlanta is a tremendous asset. Atlanta provides limitless opportunities for student learning and service as well as fun and entertainment for students, faculty, and staff. Atlanta is the fastest-growing and now ninth-largest city in the United States. Its location in the Appalachian foothills gives it the highest average elevation of any major city east of Denver and provides a more temperate climate than other Southern cities. Emory collaborates with numerous Atlanta-based organizations such as The Carter Center, the U.S. Centers for Disease Control and Prevention, and the Georgia Institute of Technology.

Emory is home to nearly 7,000 undergraduates, 20 percent of whom hail from Georgia. Every other state and 65 countries also are represented. Admission to Emory College is highly selective—about twelve high school students apply for every opening in the first-year class—and Emory consistently ranks among the top 20 universities in the annual U.S. News & World Report survey. Undergraduates also enter Emory through Oxford College, the intimate campus that was the site of the Emory’s founding in 1836.

Nearly 6,000 students are enrolled in one of Emory’s seven graduate and professional schools, all highly ranked in their fields. The Goizueta Business School’s Executive MBA Program ranks seventh worldwide and its BBA program is ranked ninth among undergraduate business programs by BusinessWeek. U.S. News ranks the Rollins School of Public Health seventh, the School of Medicine twenty-second among research-oriented medical schools, the School of Law twentieth, and the Nell Hodgson Woodruff School of Nursing twenty-sixth.
EMORY COLLEGE OF ARTS AND SCIENCES (1836)
Emory College of Arts and Sciences distinctively combines the student-centered education and personal engagement of the best liberal arts colleges with the unparalleled resources of a major research university. With a student/faculty ratio of 9:1, the college offers 80 majors, one co-major, 55 minors, and a variety of joint undergraduate-graduate programs with other Emory schools. Emory College had 15,610 applicants for the 2009 first-year class, which numbered 1,315 students from 45 states, the District of Columbia, and 23 countries. Students enjoy a vibrant campus life: many join one or more of the more than 200 arts, civic, athletic, religious, and pre-professional student organizations located on campus and many participate in a variety of Emory-sponsored service and leadership opportunities.

OXFORD COLLEGE (1836)
Oxford College, a specialized division of Emory that provides a liberal arts-intensive program for the first two years of a baccalaureate degree, has around 750 students and is located thirty-eight miles east of Atlanta on the site of Emory’s original campus in Oxford, Georgia. It is one of four undergraduate options at Emory. Students choose to attend Oxford because of its emphasis on teaching, personal interaction with professors, community setting, student diversity, leadership opportunities, and connection to Emory University. Each year between 90 to 95 percent of Oxford graduates choose to continue on automatically to the Atlanta campus to complete a bachelor’s degree at Emory College, Goizueta Business School, or the Nell Hodgson Woodruff School of Nursing.

SCHOOL OF MEDICINE (1854)
One of the nation’s finest teaching and research institutions, the medical school receives 42 applications for each of its first-year positions. The school has 517 medical students, including 14 MD/MPH students, and shares 73 MD/PhD, two MD/MBA, and three MD/MSCR (master’s in clinical research) students with Emory’s graduate programs. Additionally, the school trains more than 1,100 residents and fellows. It also houses five top-ranked health professions programs with 447 students. A total of 2,233 faculty teach in basic science and clinical departments. In 2009 the medical school received $383.5 million in research funding, including $45.8 million in funds received by medical faculty based at Yerkes National Primate Research Center. The school is known for its research programs in cancer, neuroscience, vaccine development, transplantation biology, cardiology, biomedical engineering, and genetics. The school has long-standing affiliations in patient care, teaching, and research with Grady Memorial Hospital, the Atlanta Veterans Affairs Medical Center, and Children’s Healthcare of Atlanta. Faculty clinicians in Emory’s own or affiliated teaching hospitals are responsible for more than 3.8 million patient services annually.

NELL HODGSON WOODRUFF SCHOOL OF NURSING (1905)
The Nell Hodgson Woodruff School of Nursing has 210 baccalaureate, 163 master’s, and 16 doctoral students. Bachelor’s degree graduates go on to become national and international leaders in patient care, public health, government, and education. Master’s degree graduates are qualified to seek certification as nurse practitioners, nurse midwives, and/or clinical nurse specialists. The doctoral program focuses on clinical research, with emphasis on health policy, health outcomes, and ethics. In 2009 the nursing school received $2.38 million in research funding. U.S. News & World Report ranked the school’s graduate programs 26th overall and its nurse midwifery graduate program eighth in the nation. The School of Nursing has 58 faculty, and students also learn from volunteer faculty at some 300 clinical sites. The school has 6,322 graduates.

CANDLER SCHOOL OF THEOLOGY (1914)
Strong educational programs, a superb 55-member faculty with an impressive record of research and publications, and a diverse student body of 499 from more than 50 denominations make Candler stand out among seminaries. Pitts Theology Library is the premier theological library in North America, with more than 550,000 volumes, about 20 percent of which are in its special collections. Candler’s 7,266 living alumni serve in leadership positions around the world. One of thirteen United Methodist-related seminaries, Candler’s mission is to educate faithful and creative leaders for the church’s ministries in the world. Candler students can pursue one of three master’s degrees and one doctoral degree. The innovative Master of Divinity Program gives students a broad and contextualized theological education, while requiring students to do concentrated work within a particular area of study. Joint degree programs in law, business, and public health further provide an extraordinary context for theological education.
LANEY GRADUATE SCHOOL (1919)
The Laney Graduate School awards doctoral and master's degrees in forty programs, spanning biomedical and natural sciences, business, the humanities, nursing, public health, and the social sciences. These competitive programs prepare graduates for careers ranging from college and university teaching to policy making, research, administration, and service in the public and private sectors. The Teaching Assistant Training and Teaching Opportunity Program, a core requirement for the PhD, prepares graduate students to balance the demands of teaching and research in a university setting. Emory's graduate programs encourage interdisciplinary study and cross-disciplinary exchange within the context of excellent training in core disciplines. Among the graduate school's interdisciplinary programs are the Graduate Division of Biological and Biomedical Sciences, the Graduate Institute of the Liberal Arts, the Graduate Division of Religion, and Women's Studies. In addition, the Laney Graduate School offers joint degrees with the School of Law, the School of Medicine, and Georgia Institute of Technology.

ROLLINS SCHOOL OF PUBLIC HEALTH (1990)
The Rollins School of Public Health has 866 master's and 104 doctoral students who earn degrees related to behavioral sciences and health education, biostatistics and bioinformatics, environmental and occupational health, epidemiology, health policy and management, and global health. Students also seek dual degrees in medicine, nursing, health professions, business, and law. Master's degrees are available with a concentration in clinical research. A distance-based master's program allows professionals to earn degrees while they work. The school has 165 full-time faculty, approximately 400 adjunct faculty, and 4,939 alumni. Research funding in 2009 totaled $60 million. Through its collaborations with the CDC, The Carter Center, the American Cancer Society, CARE, the Arthritis Foundation, the Task Force for Global Health, and state and local public health agencies—and in its role as a center for international health research and training—the school helps make Atlanta a worldwide destination for public health. U.S. News & World Report ranks the school seventh among its peer institutions.
ATHLETICS
Emory fields eighteen varsity sports under the auspices of NCAA Division III, whose members voluntarily agree to award no athletic scholarships or preferential treatment for student-athletes. Emory has one of the top all-around athletics programs in the NCAA Division III, based on cumulative results in the NACDA Directors’ Cup standings since fall 2000 and has had the second-highest total of student athletes receiving NCAA Postgraduate Scholarships than any other NCAA school in the past eight years.

FACULTY AND STAFF
Employees: 23,469* (includes 3,777 faculty)

Emory is the largest employer in DeKalb County and the third largest private employer in metro Atlanta.

* Includes Emory University, Emory University Hospital, Emory University Hospital Midtown, Emory Children’s Center, Emory Healthcare, The Emory Clinic, Emory University Orthopaedics and Spine Hospital, Wesley Woods Center, and Wesley Woods Senior Living

ALUMNI
The mission of the Emory Alumni Association (EAA) is to strengthen relationships among alumni worldwide, provide lifelong learning and leadership opportunities, and facilitate alumni participation in the University and its mission. The EAA represents more than 110,000 alumni living in all 50 states and more than 150 nations. By keeping alumni informed and involved in the actions of the University, the EAA keeps the spirit of Emory alive within its graduates. The EAA wants alumni to feel not only a constant connection to the University, but also feel as if they never left it.

FINANCIAL DATA
Tuition: $37,300 for undergraduates. Approximately 76 percent of all students receive some financial aid.

Operating budget: $3.0 billion, as of August 31, 2009.

Endowment and trust funds: $4.5 billion, as of August 31, 2009.

Emory University received $484.2 million in 2009.

SUSTAINABILITY
Emory’s long-standing commitment to sustainability seeks to help restore the global ecosystem, foster healthy living, and reduce the University’s impact on the local environment. A leader in sustainability, Emory was named the “2008 Distinguished Conservationist of the Year” by the Georgia Conservancy and was one of only eleven universities in the country to receive a spot on The Princeton Review’s Green Honor Roll. Emory has set aside more than half of its campus as protected green space. A portion of this forested green space includes some of the richest biodiversity within metro Atlanta. The University holds the distinction of having one of the largest inventories by square footage of LEED-certified building space among campuses in America. And Emory runs one of the largest shuttle fleets in metro Atlanta—a system in which all shuttles are 100 percent alternatively fueled. Emory aims to serve 75 percent locally or sustainably grown food in its cafeterias and hospitals by 2015.
ACADEMIC SUPPORT

Holdings of the nine Emory University Libraries total almost 3.4 million volumes, including some e-books. The libraries also provide access to thousands of electronic information resources, including more than 55,000 e-journal titles. Emory’s Manuscript, Archives, and Rare Book Library (MARBL) offers rich collections in areas such as the Irish literary revival; twentieth-century American, British, and Irish poetry; and African American literature, history, and culture. MARBL also is strong in research collections devoted to the social and cultural history of the American South, with a particular emphasis on Georgia and Atlanta.

Digital innovations at the Robert W. Woodruff Library include the continuing creation of the Trans-Atlantic Slave Trade Database, which provides the first solid, continually updated database on this five centuries-long practice. In addition, the Internet journal and scholarly forum Southern Spaces (www.southernspaces.org), based in the Woodruff Library, provides a forum for multimedia scholarship on Southern culture, while also facilitating innovative ways of organizing, presenting, and updating research.

Pitts Theology Library, one of the largest theology libraries in the country, is home to the Richard C. Kessler Reformation Collection, which documents the sixteenth-century Protestant Reformation in Germany. The Kessler collection includes more than 900 publications by Martin Luther himself—more than any other U.S. library. The Woodruff Health Sciences Center Library includes branches at Grady Memorial Hospital and Emory Hospital, as well as a Housestaff/Medical Student Learning Center at Grady. Emory’s Hugh F. MacMillan Law Library is a selective depository for U.S. government documents and is a full depository for publications of the European Union.

University Technology Services (UTS) enables Emory to teach, learn, and innovate by providing stable information technology services. UTS provides services to Emory University and Emory Healthcare including administrative applications (PeopleSoft), email and calendaring (Exchange), and twenty-four-hour support services (call center and data center). UTS also provides telephone, wireless and wired data networking, paging, cable television, and radio and video services to the Emory community.

Additionally, UTS provides academically focused technology resources such as Blackboard, iTunesU, and LearnLink, along with support for 230 technology-enhanced classrooms in Emory College. UTS Centers for Educational Technology, including ECIT and the nationally acclaimed Computing Center at Cox Hall, foster faculty/student interaction and collaborative academic activities using the latest technology.

MICHAEL C. CARLOS MUSEUM

The Michael C. Carlos Museum, located at the heart of Emory’s campus, is Georgia’s premier museum devoted to the art and history of world cultures. Founded in 1919, the museum is home to the Southeast’s most distinguished collection of art and artifacts from ancient Egypt, Greece, Rome, Nubia, the Near East, Africa, and the Americas. In addition, a works on paper collection spans from the Renaissance to the present. The Carlos Museum offers an array of educational opportunities including special exhibitions, audio tours, family guides, gallery talks, children’s programs and summer camps, interactive technology, films, internships, and much more.

THE CARTER CENTER

The not-for-profit Carter Center advances peace and health in neighborhoods and nations around the world in partnership with Emory. Guided by a fundamental commitment to human rights, the center works to prevent and resolve conflicts, enhance freedom and democracy, and improve health. Center projects have helped to improve quality of life for people in more than seventy nations.
YERKES NATIONAL PRIMATE RESEARCH CENTER

For eight decades the Yerkes Research Center has been dedicated to conducting essential basic science and translational research to advance scientific understanding and to improve human health and well-being. Yerkes is one of only eight National Institutes of Health-funded national primate research centers (NPRC). In this role, the center provides leadership, training, and resources to foster scientific creativity, collaboration, and discoveries. Yerkes-based research is grounded in scientific integrity, expert knowledge, respect for colleagues, an open exchange of ideas, and compassionate, quality animal care.

The Yerkes Research Center’s multidisciplinary research programs are leading to life-changing discoveries in infectious diseases and neuroscience. Researchers at the center are seeking to develop vaccines for infectious and noninfectious diseases, increase understanding of progressive illnesses, treat drug addiction, advance knowledge about the links between biology and behavior, and interpret brain activity through imaging. The center is the only NPRC to have onsite MRI, PET, and cyclotron facilities.

The Yerkes Research Center will continue to build upon its solid foundation of scientific advancements while offering the promise that discoveries made at the center will improve the health of the nation and the world.

EMORY HEALTHCARE

Emory Healthcare is the largest, most comprehensive health care system in Georgia and comprises the following components: Emory University Hospital, Emory University Hospital Midtown, Emory Orthopaedics and Spine Hospital, Wesley Woods Center, The Emory Clinic (the largest, most comprehensive group practice in Georgia, with approximately 1,500 physicians, nurse clinicians, and physician assistants and health centers throughout metro Atlanta), and the Emory-Children’s Center (the state’s largest pediatric multispecialty group practice). In addition, Emory Healthcare has joint ventures with HCA (Emory Johns Creek Hospital and Emory Eastside Medical Center) and with Adventist Health System (Emory-Adventist Hospital). Emory Healthcare’s total portfolio of inpatient operations includes more than 1,700 licensed beds.
