The Remi Group provides equipment maintenance management programs for organizations nationwide. We offer systems and solutions that relieve the burdens associated with all aspects of equipment lifecycle management and work with clients to gain the greatest possible return for every dollar invested in equipment assets.

Emory University

Cost Reduction
Reduces current equipment maintenance expenditures compared to conventional service contract pricing.

Cost Containment
Eliminates the duplication and cost-inefficiencies that often occur with multiple service contracts from various manufacturers.

Guaranteed Budget
Plans maintenance budgets with fixed annual costs rather than the fluctuating costs and expensive “surprises” of other maintenance programs.

Life Cycle Management
Manages the maintenance of your equipment portfolio guaranteeing decreased cost, increased equipment uptime, and extended useful life expectancy.

Total Vendor Control
Delivers an unbiased vendor solution that allows you to use your preferred service vendor or we can supply the best qualified alternative vendor available.

Management Control
Enables you to more effectively analyze the quality of the repair and service and the performance of the equipment and vendor through real-time, online reports.

Reduce Your Equipment Maintenance Costs

We analyze your current equipment maintenance portfolio, maintenance agreements, historical maintenance expenditures, and operational practices to develop a customized program to meet your unique needs. The goal of each program is to deliver the specialized management tools, expertise, and support necessary for you to achieve enhanced equipment performance coupled with significant cost savings.

Two Program Options:

You Call Service Provider Directly
- Equipment failure occurs.
- End user calls preferred service provider.
- Equipment is repaired.
- The Remi Group generates a check directly to vendor for covered corrective or preventive maintenance work.

Service Management System
- Equipment failure occurs.
- End user calls toll free service center number or requests service online.
- Remi contacts the client’s preferred service vendors and obtains Estimated Time of Arrival (ETA).
- Remi informs end user of ETA.
- Equipment is repaired.
- The Remi Group generates a check directly to vendor for covered corrective or preventive maintenance work.

Both options provide detailed repair status/repair info online.

Typical Equipment Covered:

**Scientific Equipment**
- Analyzers
- Automated Slide Strainer
- C-Arms
- Cell Savers
- Centrifuge
- Co-Oximeters
- Cryostat
- Densitometers
